

## Tecco Mesh

### Tecco Mesh

- 1.High safety and tensile strength
- 2.Rhomboid mesh structure for stability
- 3.Corrosion and rust resistance
- 4.Environmental friendly for plant growth
- 5.Easy to install and transport
- 6.Durable and long service life
- 7.The TECCO system consists of four main components include high steel wire mesh, spike plate, steel anchor and sewing rope that are carefully coordinated with each other.
- 8.Soil, strongly weathered slope reinforcement, river bank erosion control, soil and water loss control, Slope greening, etc.

Tecco Mesh						
Wire Diameter mm	Hole size (mm)	Weight Kg/ m <sup>2</sup>	Width M/Roll	Length M/Roll	Wire Strength	Breaking Load of Single Wire
2	62x95	1.15	3.5	10		
3	83x143	1.65	3.9	20		
4	83x138	3.30	3.3	30	1770MPA	12.5KN
	102 x 177	2.60
